The Tobacco Control Act and the FDA's Tobacco Regulation: How Science Informs Policy

Thursday, February 5, 2015
2:30 pm – 3:30 pm
Georgia State University Center Room 485

Micah Berman, JD
Assistant Professor
Center of Excellence in Tobacco Regulatory Science
College of Public Health
and Michael E. Moritz College of Law
The Ohio State University

Seminar Overview: After briefly reviewing the history of tobacco regulation, this presentation will provide an overview of the FDA's authority to regulate tobacco products. The goal of this presentation is explore how researchers can align their research agenda with the FDA’s legal and regulatory authority. This will help to ensure that research supports the creation of regulations that will stand up to the inevitable legal challenges brought by the tobacco industry.

This seminar is part of the GSU Tobacco Center of Regulatory Science seminar series and is made possible by funding from the NIH/NIDA and FDA Center for Tobacco Products (CTP).
