

STUDENT EMERGENCY RESPONSE TEAM COVID-19 Ambassadors for Georgia State

Members of the Campus of Care Committee, a collaborative effort between the School of Public Health and the Division of Student Success, have created a 7-step, public health campaign led by and geared for students to share information about the COVID-19 pandemic. This innovative campaign combines student videos, social media interaction, confidential communication portals, and much more to spread awareness and share research-based information.

If your school, class, organization, or club would like to sign up for a student led discussion with the Student Emergency Response Team, **please click here to submit a request form.**

Questions? Please contact Dr. Kim Ramsey White at kwhite@gsu.edu.
